What you will learn

Our PMP course outline covers project management fundamentals, the PMI framework, and the three domains of People, Process, and Business Environment. At the end of the training, you will have a better understanding of the following:

People (Leadership & Team Management)

Focus on managing and leading project teams effectively. Topics include conflict resolution, team motivation, servant leadership, and fostering a high-performing team environment.

Process (Project Management Practices)

Master the predictive, agile, and hybrid methodologies, covering the full project lifecycle—initiating, planning, executing, monitoring, controlling, and closing projects. This includes understanding key tools, techniques, and processes.

Business Environment (Organizational Influence)

Learn how projects are affected by organizational structures and how to align project objectives with business strategy. Understand the role of project managers in ensuring compliance with laws, regulations, and organizational governance.

Agile and Hybrid Practices

A significant portion of the PMP exam now covers agile and hybrid project management. Key areas include iterative approaches, retrospectives, backlogs, sprints, and managing adaptive project environments effectively.

Exam Strategy and Practice

Understand the structure of PMP exam questions, including scenario-based and situational questions. Identify weak areas and ensure continuous practice with our 1,500 question exam simulator.
